Conversation

Our Japanese Language Conversation Course includes speaking and listening, with emphasis on improving students' speaking ability. Students do not require any textbooks: instead, they will be given various written assignments throughout the course in order to expand their vocabulary and improve their grammar. We understand that our students are sometimes overwhelmed by their busy schedules, so in case they do not have the time to complete written assignments, they are encouraged to read texts in Japanese instead to improve their conversation skills. We advise students to study our Japanese Language Conversation Course for at least half a year.

- this course is most suitable for those who do not have the time to study, but wish to become fluent speakers
- in cases when a student cannot study on a regular basis, we encourage them to continue with occasional lessons to maintain their language level
- students can study anytime, anywhere
- all courses we offer consist of private, customized lessons
- we accommodate students of all language levels
